

Solutions for Borderless Banking

INSIGHT CRB System

KENEX introduces to you INSIGHT software suite; an end-to-end commercial credit management software solution that enables loan officers, credit analysts and senior bankers to efficiently review, analyze, collaborate and decide on commercial credit applications, manage the relationships with commercial customers and control credit risk.

INSIGHT provides credit professionals with the information, analysis tools; documentation and collaboration capabilities that they need to profitably manage all types of commercial credit.

Key System Features

- INSIGHT integrates all aspects of managing commercial credit applications, including gathering of customer information, analysis, reporting and decision-making.
- The system is designed with the scope of banking regulations 2008 – Kenyan banking Act CAP 488
- The system has Credit Bureau reporting module designed using KBA (Kenya Bankers Association) specifications / format. The module generates data to be submitted to the Credit Reference Bureau (KENYA) monthly and also on a cumulative basis
- INSIGHT frees up time by automating clerical, time-consuming tasks and increasing work efficiency through adaptive workflow, collaboration and information sharing.
- The increased efficiency of relationship managers and credit analysts translates into faster credit application turnaround times.
- INSIGHT manages all customer interactions and allows immediate viewing of all customer banking data, documents and requests.

- INSIGHT is a desktop application with a robust, secure and scalable architecture.

The system, after collecting data from your Banking System, generates standard files that can be submitted to CRB.
